kaitools

Kaitools for Lexis Affinity Features

Contact Lookup

Quickly lookup Affinity phonebook records without leaving Word.

Recent Documents

Access a searchable list of recent documents, displaying their Affinity document description.

Friendly Window Titles

Display the Affinity document description alongside the file name in the header of the document window.

Enhanced Execution Clauses

Automatically bring Affinity matter parties into the Kaitools Execution Clause tool.

Enhanced Developer Tools

Including a reimagining of the Affinity field builder as well as an SQL assistant to help extract the data you need using a little known, but powerful Affinity feature..

Enhanced Document Exporter

Export documents using their Affinity DM description rather than the obsure Affinity-generated file name.

and more...

Kaitools ensures that you get the job done as quickly and easily as possible, allowing you to concentrate on what is really important.

Execution Clauses

Insert your own execution clauses and signing lines without a single line of code.

Calculator

A handy calculator right inside Word. You can even calculate selected table cells with a single click,

Watermarks

Easily create and share custom watermarks using the simple watermark editor.

Document Exporter

Easily export documents for discovery in either their original format or PDF.

Precedent Developer Tools

Handy tools to insert stop codes, merge fields, optional and sample text.

User Profiles

With Kaitools you are in control. User profiles allow you to control which staff have access to each feature..

Themes

Customise the look of Kaitools with a selection of built-in themes.
